ELSEVIER

Coastal Engineering 42 (2001) 375–376

Coastal Engineering
An International Journal for Coastal, Harbour and Offshore Engineers

www.elsevier.com/locate/coastaleng

Contents of volume 42

Research Papers

Experimental investigation of vanes as a means of beach protection
F. Marelius 1

Wave parameter tuning for the application of the mild-slope equation on steep beaches and in shallow water
U.T. Ehrenmark and P.S. Williams 17

The influence of swash infiltration–exfiltration on beach face sediment transport: onshore or offshore?
T. Butt, P. Russell and I. Turner 35

Large eddy simulation of breaking waves
E.D. Christensen and R. Deigaard 53

Water waves within a porous medium on an undulating bed
S. Zhu 87

Book Review 103

Research Papers

Infiltration effects on sediment mobility under waves
P. Nielsen, S. Robert, B. Møller-Christiansen and P. Oliva 105

Long-term morphological modeling of a tidal inlet: the Arcachon Basin, France
F. Cayocca 115

Cost of beach maintenance in the Gulf of Cadiz (SW Spain)
J.J. Muñoz-Perez, B. Lopez de San Roman-Blanco, J.M. Gutierrez-Mas, L. Moreno and G.J. Cuena 143

Internal generation of waves for extended Boussinesq equations
C. Lee, Y.-S. Cho and K. Yum 155

Wave diffraction in a current over a local shoal
B. Teng, M. Zhao and W. Bai 163

High-resolution field measurements and numerical modelling of intra-wave sediment suspension on plane beds under shoaling waves
K.P. Black and C.E. Vincent 173

Establishing uniform longshore currents in a large-scale sediment transport facility
D.G. Hamilton and B.A. Ebersole 199

Quadtree grid numerical model of nearshore wave–current interaction
K.-Y. Park and A.G.L. Borthwick 219

The pressure impulse in a fluid saturated crack in a sea wall
S.J. Cox and M.J. Cooker 241

Impulsive seaward loads induced by wave overtopping on caisson breakwaters
M.J. Walkden, D.J. Wood, T. Bruce and D.H. Peregrine 257

Experimental investigation of the harmonic generation by waves over a submerged plate
J. Brossard and M. Chagdali 277

The influence of air and scale on wave impact pressures
G.N. Bullock, A.R. Crawford, P.J. Hewson, M.J.A. Walkden and P.A.D. Bird 291

Onset of scour below pipelines and self-burial
B.M. Sumer, C. Truelsen, T. Sichmann and J. Fredsøe 313

PII: S0378-3839(01)00003-5

A fully nonlinear Boussinesq model in generalized curvilinear coordinates
F. Shi, R.A. Dalrymple, J.T. Kirby, Q. Chen and A. Kennedy 337
Simulation of wave breaking effects in two-dimensional elliptic harbor wave models
L. Zhao, V. Panchang, W. Chen, Z. Demirbilek and N. Chhabbra 359

Contents Vol. 42 375
